
Prof. Simon Rees

Not a Load of Bumfuzzle and Faradiddle

Discover the creative and imaginative world of science

Join Prof. Simon Rees (Durham University) for this family-friendly, interactive show exploring the creative and imaginative world of science. Expect fun and surprises as we explore the invisible world around us. Drawing on examples of great scientists, past and present, discover how we can unleash superpowers such as sticking to walls like Spiderman or move objects without touching them like a Jedi Knight. This audience participation show will inspire the curious to ask questions about the world around them and unleash their human superpowers.

From the author of *Creative Chemists*, Simon has developed a unique science show that inspires curious young minds with an interactive and comedic experience. This is no ordinary science show!

Prof. Simon Rees is marking his Edinburgh Festival Fringe debut with a show aimed squarely at those, young and old, who are curious about the world around them. Simon is an experienced educator and performer who has been engaging audiences in science for many years and is now bringing his unique show to the Fringe.

'Your show is a moment of awe and wonder'
Primary School Teacher Trainer
